Company Profile

Our Product and Service

Software Division:

HRMS Payroll Software:

HRMS helps in automating the entire HR operations of any company and addressing the full spectrum of human resources management issues.

FIT ERP - Textile Industry:

FIT ERP is a totally integrated application that connects to all departments of the company seamlessly may it be a Manufacturing, Distribution or Retailing business. The application ensure smooth flow of data between each business process through efficient Material Plan in a controlled manner.

FIT SCM | CRM:

FIT-SCM helps in automation of the entire business from warehousing, distribution and retailing under a single network through its web-enabled SCM module.

The CRM module acts as a bridge between the customer and the agent to conduct business in a single window, where every information or status of an order is instantly available to the entire chain of people involved in the job.

Hostel Management Software:

Hostel Management System is designed for better interaction between Management, Staff and Members. Hostel Management System handles all the requirements for easy Hostel Management. This software will help the Hostel Center to structuralize the activities and maintain data transparency where needed and properly store data for regular operations and future analysis.

ID-Card Manufacturing Division:

ID cards, its accessories and Lanyards & Multicolor Lanyards. We are the leading ID card makers of finest and Executive cards, RFID Cards, Smart Cards, Lanyards, Holder and Hooks.

Company Profile

Security Solution Division:

Bio Metric Attendance Device:

A biometric system is a technological system that uses information about a person (or other biological organism) to identify that person. Biometric systems rely on specific data about unique biological traits in order to work effectively.

IOT GPS | All Tracking Devices:

Vehicle Tracking System (VTS) is the technology used to determine the location of a vehicle using different methods like GPS and other radio navigation systems operating through satellites and ground based stations.

Door | Gate Automation (Guard Patrolling, Turnstiles):

Automatic gates are used to control access into a secured area. The gate operator is the machinery that moves the gate in and out of the gate opening. Gate operators are electrically-powered and may be chain-driven, gear-driven, or hydraulic depending on the type of operator.

Auto Students Roll Call System for College:

“Smart Roll Call” which compiles to above requirement besides being faster & effective tool to handle large Lecture Halls where even roll-call is also not possible. It is a Solution consisting of a Hand- held Biometric Hardware & Application Software to generate Analytical attendance report. It is effectively used in colleges.

Smart Bus Attendance System:

It allows you to tracks your vehicles location in an intelligent manner providing you the appropriate information at the right time. Apart from providing Real Time and Historical tracking on the WEB, it provides real time alerts, events and scheduled reports thru SMS on your mobile phone.

Career Architects Program:

“THE ART OF WINNING THE TALENT WAR & OPTIMIZING, ENGAGEMENT, PERFORMANCE & RETENTION OF HUMAN RESOURCES” , It exceed the results of other talent management methods and personality tests by aligning School and College Students talent/intelligence, people's qualifications and passions with Carrier development and company specific jobs.
